

SH 9 Single Stage Cylinder Regulators Medium Duty

SH 9* Regulator

The SH 9 Series high pressure self-venting regulator is a reliable compact piston style. The self venting feature eliminates the need to open the system to lower delivery pressures

APPLICATION AND USES

- Fire fighting air systems
- Air tank fill systems
- Component testing
- Aircraft service equipment
- Calibration panels

FEATURES & BENEFITS

- Self-venting
- 6000 PSIG inlet
- Variety of delivery ranges
- Panel mount capabilities
- High flow capabilities

DESIGN/CONSTRUCTION

- Piston type activation
- Machined bar stock body and housing cap
- 2 1/2" gauges brass
- Cartridge type seat assembly
- Adjusting knob

* See Model SR 4 for high pressure delivery regulation. Section A, page 16.
